OUTDOOR KNIVES

Functional design combined with hand craftsmanship

kershaw Outdoor Knives

Scientific improvements in traditional designs have been combined with practical new materials and superb hand craftsmanship to produce an entirely new concept in functional outdoor knives. Choose the model to fit your needs and you will discover a new experience in cutting control.

Kershaw Knives are shaped and balanced to fit your hand naturally. Compare these knives with any others and we believe you will find them far more comfortable in your hand, however you choose to hold them.

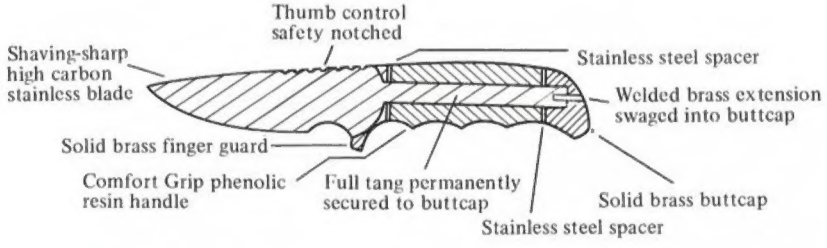
Each handle is shaped from a tough and handsome deep brown Space Age phenolic resin compound that provides a comfortable gripping surface and is practically indestructible. The contoured Comfort Grip has built-in safety features, yet there are no sharp points to bruise your hand or interfere with the way you choose to hold the knife.

The solid brass buttcap and finger guard are boldly contoured for added safety and beauty.

Each heavy duty power edge blade is made of special high carbon rust resistant steel precision plunge ground and tempered by an advanced sub-zero quench treating process. This steel holds a shaving-sharp edge that is easy for you to maintain. The thickness of the blade is determined by the function of each knife.

A full tang extends through the entire length of the Comfort Grip handle and is permanently swaged into the brass buttcap. Permanent bond epoxy around the tang positively secures tang and handle. Thus each knife is a solid unit that can withstand roughest field use.

Each knife comes in a custom saddle leather sheath of safe, simple and practical design. The sheath requires no breaking in because it is contoured to the exact shape of each blade.



GUARANTEE

We guarantee Kershaw Knives to be shaving sharp when they come from the factory. If a Kershaw Knife ever proves defective under normal use, return it directly to me and it will be repaired or replaced without charge. Naturally this simple guarantee does not cover intentional misuse or neglect.

Pete Kershaw

FIELD & STREAM – 4" BLADE (10.2 cm)

Blade thickness: .080" (2.0 mm); overall length: 8-3/8" (21.3 cm)

Compact knife designed for general outdoor use. An effective cutting tool for campers, fishermen, hunters. **MODEL 1029** **$26.50**

CAMP & STREAM – 6-1/4" BLADE (15.9 cm)

Blade thickness: .080" (2.0 mm); overall length: 10-1/2" (26.7 cm)

The long flexible slicing blade makes this an ideal knife for cleaning and filleting fish, or for general camp use. **MODEL 1031** **$27.50**

CAMP & FIELD – 4" BLADE (10.2 cm)

Blade thickness: .160" (4.0 mm); overall length: 8-1/4" (21.0 cm)

Traditional compact knife for campers and hunters. Finger groove and serrated spine at back of blade allow you to move your hand forward for precision cutting with complete control. Delicate work is made easy with the tapered dropped point. **MODEL 1030** **$29.50**

SKINNER – 4-1/4" BLADE (10.8 cm)

Blade thickness: .160" (4.0 mm); overall length: 9" (22.9 cm)

Traditional skinning knife with improved dropped point. Finger groove and serrated spine at back of blade allow you to move your hand forward for precision cutting and scraping with complete control. **MODEL 1032** **$32.50**

FIELD – 5" BLADE (12.7 cm)

Blade thickness: .180" (4.5 mm); overall length: 9-3/4" (24.8 cm)

Rugged and compact knife for hunting and heavy field use. Finger groove and serrated spine at back of blade allow you to move your hand forward for precision cutting with complete control. Delicate work is made easy with the tapered dropped point. **MODEL 1034** **$34.50**

HEAVY DUTY FIELD – 5-1/2" BLADE (14.0 cm)

Blade thickness: .180" (4.5 mm); overall length: 10-1/4" (26.0 cm)

Big and brawny knife for hunting and rugged field use. Finger groove and serrated spine at back of blade allow you to move your hand forward for precision cutting with complete control. **MODEL 1035** **$36.50**

kershaw Pocket Knives

Kershaw heavy-duty pocket knives carry comfortably in trouser pocket for every day use. There are no sharp corners to wear through the fabric. Incorporating lightweight and streamlined design with big and brawny blades, they are a new and improved concept in easy-riding comfort and utility.

Thin stainless steel cases detailed with handsome rosewood inlays are specially balanced to fit the hand naturally.

Power edge blades are made of special high carbon, rust-resistant steel tempered by an advanced sub-zero quench treating process. The super-sharp edges are easy to maintain.

The main blade of two models locks firmly in open position and will not break away under roughest use. One small model contains heavy-duty folding scissors.

Kershaw Pocket Knives fit the hand . . . fit the pocket . . . fit the job.
